

**Meghan E. Smith**  
**Executive Assistant & Project Manager**  
**Biography**

---

[www.pinnaclelanddevelopment.com](http://www.pinnaclelanddevelopment.com)

Meghan joined the Pinnacle Land Development team with an extensive background in multi unit management. She has a great amount of positive energy that translates well with the constantly changing workflow in land development and the project management industry.

Meghan does a multitude of work in all stages of a project and assists Managing Partner Randal Clarno during land acquisition, title, feasibility stages, due diligence, pre-plat, zoning, final plat, and the beginnings of construction. It takes a great deal of flexibility, multi-tasking and follow up to keep up with multiple projects annually but she is driven, easy to work with and performs with a great deal of professionalism. She really enjoys meeting and working with Consultants and Vendors. Meghan values the collaboration with cities, counties, land planners, engineers, construction professionals, and it is one of the highlights of her position. Establishing connections with other professionals to see a project develop from point A to the end result is a really exciting and profound.

Land Development is not a quick process so Meghan really loves to see the end result of a beautiful community that results from months and years of planning. Currently Meghan is working on 7 projects; 2 in active construction.

Meghan is not only proud of her professional career, but her family as well. She is a busy mom to 3 little boys and has been happily married for 10 years. She is Native to Arizona and enjoys all it has to offer; when she isn't busy working you can find her and her family out on desert trails, at the lake or out camping and soaking up the Arizona sun.
